100%							

Technical Accuracy: Does the student accurately and correctly demonstrate technical concepts and necessary code related to Data Science Topic?

- **Exceptional:** The student has accurately and correctly used code to analyze their data. The code is without errors.
- **Good:** The student accurately and correctly demonstrated most of the technical concepts has the ability to overcome errors; however the code is incomplete or extra code is evident.
- **Satisfactory:** The student has accurately and correctly demonstrated some of the technical concepts in their work and progresses with minor errors.
- **Unsatisfactory:** The student has demonstrated a lack of understanding of technical concepts and has not applied most of the technical concepts and progresses without correcting errors.
- **Does Not Meet:** The student has not demonstrated any understanding of technical concepts and has not accurately and does not progress due to errors.

Completeness: Does the student complete all the required assignment parts?

- **Exceptional:** The student has completed all the required tasks and steps in the assignment
- **Good:** The student has completed all the required tasks and steps in the assignment, with minimal or no errors.
- **Satisfactory:** The student has completed most of the required tasks and steps in the assignment, with some errors and has demonstrated an understanding of the assignment.
- **Unsatisfactory:** The student has completed some of the required tasks and steps in the assignment, with many errors and has demonstrated a lack of understanding of the assignment.
- **Does Not Meet:** The student has not completed any of the required tasks and steps in the assignment, or not followed the instructions, and has demonstrated no understanding of the assignment.

Analysis and Critical Thinking/ Competency: Does the student demonstrate the ability to analyze and evaluate the information they have gathered and draw meaningful conclusions?

- **Exceptional:** The student has demonstrated the ability to analyze and evaluate the information they have gathered in-depth and has drawn meaningful conclusions that are well-supported by evidence. The student has also shown the ability to identify patterns, connections, and relationships in the data, and has applied critical thinking to the information they have gathered.
- **Good:** The student has demonstrated the ability to analyze and evaluate the information they have gathered and has drawn somewhat meaningful conclusions that are supported by evidence. The student has also shown the ability to identify patterns and connections in the data; but may have inaccurately interpreted the results.
- **Satisfactory:** The student has demonstrated the ability to analyze and evaluate the information they have gathered, but the conclusions are not well-supported by evidence. The student has shown some ability to identify patterns and connections in the data, and may have inaccurately interpreted the results.
- **Unsatisfactory**: The student has not demonstrated the ability to analyze and evaluate the information they have gathered, and the conclusions are not supported by evidence. The student has not shown the ability to identify patterns and connections in the data, and has not applied critical thinking to the information they have gathered.
- **Does Not Meet**: The student has not demonstrated the ability to analyze or evaluate the information they have gathered, and has not drawn any conclusions. The student has not shown the ability to identify patterns and connections in the data, and has not applied critical thinking to the information they have gathered.

Timely Submission: Does the student submit the lab report by the deadline and in a timely manner?

- **Exceptional:** Assignment was submitted by the due date.
- **Does Not Meet:** Assignment was submitted after the original due date.
